it is difficult to ignore the fact that even as the united states becomes much more racially and ethnically diverse our neighborhoods remain largely segregated the 1968 fair housing act and 1977 community reinvestment act promised to end discrimination yet for millions of americans housing options remain far removed from the american dream why do most neighborhoods in american cities continue to be racially divided the problem suggests mara sidney lies with the policies themselves she contends that to understand why discrimination persists we need to understand the political challenges faced by advocacy groups who implement them in unfair housing she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination what actions they took and which political relationships they cultivated as a result local governments became less likely to include housing discrimination on their agendas existing laws went unenforced and racial segregation continued a former undercover investigator for a fair housing advocacy group sidney takes readers into the neighborhoods of minneapolis and denver to show how federal housing policy actually works she examines how these laws played out in these cities and reveals how they eroded activists capability to force more sweeping reform in housing policy sidney also shows how activist groups can cultivate community resources to overcome these difficulties looking across levels of government to analyze how national policies interact with local politics in the first book to apply policy design theories of anne schneider and helen ingram to an empirical case sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation as battles over fair housing continue her book helps us understand the shape of the battlefield and the prospects for victory

the use of airpower in wartime calls to mind the massive bombings of world war ii but airplanes have long been instrumental in small wars as well ever since its use by the french to put down rebellious moroccan tribes in 1913 airpower has been employed to fight in limited but often lengthy small conflicts around the globe this is the first comprehensive history of airpower in small wars conflicts pitting states against non state groups such as insurgents bandits factions and terrorists tracing it from the early years of the twentieth century to the present day it examines dozens of conflicts with strikingly different scenarios the greek civil war the philippine anti huk campaign french and british colonial wars the war in south vietnam before the american escalation counterinsurgency in southern africa latin american counterguerrilla operations and counterinsurgency and counterterrorist campaigns in the middle east over the last four decades for each war the

authors describe the strategies employed on both sides of the conflict the air forces engaged and the specific airpower tactics employed they discuss the ground campaigns and provide the political background necessary to understand the air campaigns and in each case they judge the utility of airpower in its broadest sense in their historic sweep they show how forms of airpower evolved from planes to police helicopters aircraft of the civilian air reserve and today s unmanned aircraft they also disclose how small wars after world war ii required new strategies operational solutions and tactics by taking this broad view of small war airpower the authors are able to make assessments about the most effective and least effective means of employing airpower they offer specific conclusions ranging from the importance of comprehensive strategy to the need for the united states and its allies to expand small wars training programs airpower in small wars will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty first century

education is intimately connected to many of the most important and contentious questions confronting american society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance elementary and secondary schooling has long been the province of state and local governments but when george w bush signed into law the no child left behind act in 2002 it signaled an unprecedented expansion of the federal role in public education this book provides the first balanced in depth analysis of how no child left behind nclb became law patrick mcguinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools his book provides the essential political context for understanding nclb the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare he places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 elementary and secondary education act chronicles the concerns raised by the 1983

report a nation at risk and shows how education became a major campaign issue for both parties in the 1990s mcguinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict mcguinn traces the republican shift from seeking to eliminate the u s department of education to embracing federal leadership in school reform then details the negotiations over nclb the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform

like other big city school systems chicago s has been repeatedly reformed over the last century yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students many blame the educational establishment for resisting change other critics argue that reform occurs too often still others claim it comes not often enough dorothy shipps reappraises the tumultuous history of educational progress in chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out shipps chronicles how chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others to show why city schools have failed urban children so badly she traces chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s she also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates business people may be too wedded to a stunted view of educators to forge a productive partnership for change unionized teachers bridle at the second class status accorded them by managers if reform is to reach deeply into classrooms shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests this study clearly shows that in chicago as elsewhere urban schooling is intertwined with politics and power by reviewing more than a century of corporate efforts

to make education work shipps makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership
